

The Raine School of Fashion

Innovation + Sustainability.

THE FUTURE OF FASHION STARTS HERE

"Education doesn't have to be boring, expensive, or take years" – Nova Lorraine. Founder of Raine Magazine and Co-Founder of The Raine School.

OUR MISSION

Welcome to a new kind of educational platform. We have a passion to help standardize the language of sustainability and break down the barriers in communicating, entering and marketing eco fashion.

Our innovative way of delivering our content will answer the need for efficient and in depth learning for fashion professionals, young brands, and fashion enthusiasts.

We believe everyone can make a personalized contribution to the sustainable movement.

It all began with the idea for a sustainable future.

Our team of instructors and advisors have 20+ years experience and/or teach at top institutions including the FIT, NY university, University of Leeds (UK) and Penn State University.

BASED IN THE UK AND US.

HOW YOU WILL LEARN:

- Courses delivered as podcasts.**
- Courses episodes running between 30 and 45 minutes.**
- All courses are taught by industry experts, they interview professionals and entrepreneurs in fashion business.**

OUR COURSES:

Sustainable Fashion:

This course will provide the knowledge you need to initiate your journey in the sustainable fashion world.

Textiles & Sourcing in Fashion:

This course will cover all the components and considerations of sustainable materials for fashion.

Experts in Sustainability across Industries:

Learn how experts from some of the world's most sustainable organizations understand what made them successful.

Entrepreneurs in Sustainable Fashion:

Building an understanding of the principles of entrepreneurship and its relationship with sustainability.

Sustainable Home & Interiors:

Use of sustainable architects and “green” interior design all with low environmental impact, waste and energy consumption.

Innovation & Technology in Fashion:

Take a look into technologies within the fashion industry such as 3D printing, blockchain, Artificial Intelligence, Machine Learning and discuss products from industry leading companies.
